# Creditsafe's Sage 50 App

Seamlessly integrate credit, financial and contact data into your Sage account.

Did you know?

There are over 1 million company changes every single day, so we update our database just as often to keep your business operating on up-to-date, accurate information.

A brand new business data app for Sage 50

Creditsafe's Sage 50 App is the first plug-in that helps you minimise credit risk and improve the accuracy of your customer records. Powered by Creditsafe's database of over 240 million businesses from over 100 countries worldwide, the app allows you to create and update Sage 50 customer records with accurate information at the click of a button.

Creditsafe's world leading data is trusted by over 200,000 subscription customers globally to reduce their bad debt and exposure to credit risk. With the Sage 50 App you can achieve the same results quickly by appending your customers' financial, credit and contact details to their Sage records making it easy for your entire team to view them.

Don't just take our word for it, try the app yourself with a free trial today:

Why integrate?

Managing customer information and keeping a healthy approach to risk can be a tricky task, especially when you have a large number of customers to keep on top of. With this in mind, we have developed our Sage 50 App to help you:

Improve productivity

Instantly create and update your customer records with accurate contact and credit data, saving the time it would have taken to gather information and create records from scratch.

Minimise human error

Remove the need to manually enter company details. The app keeps human error to an absolute minimum to improve the accuracy of your customer data.

Avoid invoicing errors

67% of invoices contain incorrect company information, which can lead to overdue payments. Be confident that you are invoicing to the correct company details with accurate data from Creditsafe.
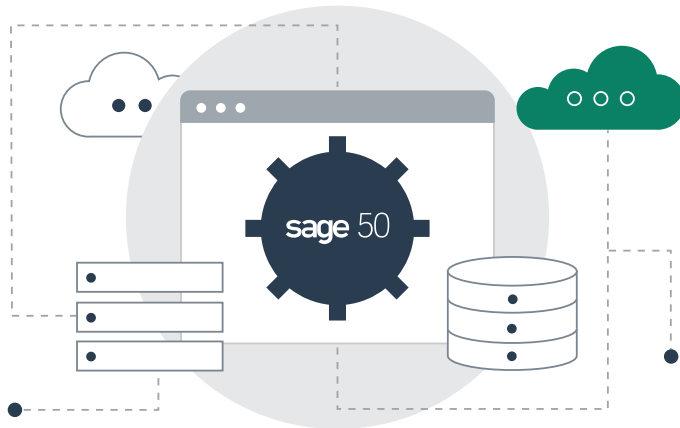

Reduce bad debt

With credit scores and limits in plain view it's easier and quicker to make informed choices that will help your business minimise credit risk and avoid bad debt.

View an entire business report within Sage 50

Access a full Creditsafe business report instantly with in-app reports. Easily see a company's credit score, recommended credit limit, active CCJ's, group structure, linkages and much more. With detailed in-app reports your team will have all the company details needed to effectively reduce bad debt, prioritise collection and spot new opportunities.

Creditsafe reports give you a full 360˚ view of a company, with details on:

- Directors & shareholders
- Full 5 years of financials
- Group structure
- Trading locations
- Registration & summary info
- Active CCJs
- Event history
- Trade payment data

Create & update your Sage customer records

Instantly create new records using Creditsafe's trusted data to pre-populate key company details. Not only will this speed up your onboarding process, but with continued access to company credit and contact details your team can easily maintain accurate records and a healthy approach to credit risk.

Append accurate customer information including:

- Registered company name
- Registered address
- Director details
- Telephone number
- Credit score
- Credit limit

Did you know? - Inputting errors are one of the biggest contributors to incorrect data within a business. The Sage 50 App will minimise these errors by appending accurate company details for you.

Receive alerts when company details change

With in-app company monitoring alerts we will help you to keep a close eye on your customers and suppliers, without the need to regularly check their reports. Any time there is an important change to a company on your monitoring list, we will let you know.

Not only will this allow you to keep customer records and invoicing details accurate, it will also help you to spot the warning signs of a company heading into trouble before it's too late.

Did you know?

Creditsafe is actively predicting more than 70% of all business failures each month. Our scoring model takes into account thousands of data sources to generate a single and easy to understand credit score.

Your business intelligence experts

As the world's most used provider of online business credit reports, we are proud to have the largest wholly owned database in the industry as well as live data from trusted global partners. Our instant online reports are available for over 240 million businesses from over 100 countries, which you can now access at the click of a button in Sage 50.

We gather information from only the most trusted sources, ensuring Creditsafe's reports offer the best source of intelligence you need to make confident decisions within your business.

Your satisfaction is our biggest priority

We take great pride in our customer service here at Creditsafe and make sure every customer receives the support they need to get the most out of their membership.

Same day installation

We can complete your Sage 50 integration process within a matter of hours so that you can begin using the app the very same day.

24 hour online support

Our online Help Hub is home to our product user guides, FAQs and video overviews; so that you always have immediate access to product information when you need it.

Dedicated account management

You will be assigned a dedicated account manager when you join us. Your account manager will be here to help you get the most out of your integration.

Fast, straightforward query resolution

You can also submit a new question to our Business Support team via our Help Hub. The majority of our queries are resolved the very same day.

Developed with a Sage Strategic Partner

We only work with the best, so naturally we chose AlpahLogix who are a Sage Strategic Partner, to develop the Sage 50 App with us. AlphaLogix are one of the UK's largest accredited Sage partners, developing effective Sage solutions for SME and blue chip companies for over 20 years.
